

## OCIENT RAPID PROTOTYPE PACKAGE

Unleash the power of your data with the **Ocient Rapid Prototype Package**.

Experience the unmatched speed and precision of a large-scale data analytics solution tailored to your mission requirements. Whether you're handling large datasets (100 terabytes to multiple petabytes), seeking real-time decision-making capabilities, or starting a new research and development effort fueled by data, now you can get started even faster.

### WHY CHOOSE THE OCIENT RAPID PROTOTYPE PACKAGE?

**Turn Data Into Intelligence Faster.** Leverage Ocient's platform to process and analyze massive datasets in seconds rather than hours, empowering your team to make smarter decisions, faster.

**Purpose-Built for Complex Missions.** From geospatial intelligence to AI/ML insights, our solution transforms mission-critical data into actionable intelligence, accelerating outcomes for systems integrators and key US government entities like the DoD, civilian agencies, and intelligence agencies.

**Flexible and Cost-Efficient.** With deployment options ranging from on premises to cloud or hybrid environments, Ocient is equipped to seamlessly integrate into your existing systems while lowering operational costs.

### WHAT'S INCLUDED?

#### Ocient Mission Workshop

Onboarding and training sessions to familiarize your team with Ocient's software and to ensure optimization of our tools to meet your objectives.

#### Ocient Simulator

Test and refine your data solutions with a fully functional simulator. From loading data to creating custom queries and integrating governance, you'll have the opportunity to experience the power of the Ocient platform first-hand.

#### Ocient Rapid Prototype System

Kickstart your deployment with an all-in-one system — including foundation, loader, and SQL tools — for deployment in OcientCloud® or your public cloud environment.

#### Real-Time Capabilities

Test and demonstrate data management strategies for unified analytics (ETL, aggregation, querying, and AI/ML readiness). See how Ocient integrates with your BI tools, mapping tools, and data science platforms before full-scale deployment.

# HOW IT WORKS

1

## Discovery Call

We'll conduct a tailored deep-dive to understand your use case, challenges, and desired outcomes.

2

## Choose Your Deployment

Select from cloud, on-premises, or hybrid solutions, customized for your specific data needs.

3

## Mission Workshop

Onboard with the Ocient team to align on objectives and get familiar with the Ocient platform

4

## Rapid Prototyping

Start using your Ocient Starter System to run queries, test data pipelines, and refine analytics strategies.

# WHY JOIN NOW?

***Limited-Time Offer Ending Sept 30, 2025***

This exclusive early-adopter program is designed to give agencies the opportunity to test and prototype cutting-edge data analytics capabilities at a discounted fee of \$25,000. Payment is simple, through the Federal Credit Card acquisition process. Get in touch with our government team for more details.

# GET THE OCIENT ADVANTAGE

Expand your agency's capabilities with a future-proofed solution for modern data challenges. With the Ocient Rapid Prototype Package, you'll experience first-hand the groundbreaking efficiency, speed, and intelligence Ocient delivers.

**Contact our team and start transforming your data today**

Don't miss this opportunity to revolutionize how your agency handles data. Email our team at [governmentsales@ocient.com](mailto:governmentsales@ocient.com) to get started.
