MAXIMIZE PERFORMANCE AND SAVINGS WITH OCIENTCLOUD

OcientCloud™ gives you the best of both worlds: the control and security of an on-prem solution paired with the simplified management of a cloud deployment

An Abundance of Choices

Options abound for organizations looking to deploy new database and data warehouse solutions. It's no longer a matter of selecting the best on-premises hardware for your needs. Today, companies must choose between on-prem, public cloud, private cloud and hybrid solutions. There is no one-size-fits-all, but determining which solution fits your organization's needs most closely can be difficult. The Ocient Hyperscale Data Warehouse is available on a variety of platforms, including on-premises, Google Cloud Platform, Amazon Web Services, and the OcientCloud, hosted by Ocient.

> **I was so impressed by the solution Ocient built. I could sit back and focus in other areas while our hyperscale solution came to life and delivered exactly what we needed."**
>
> *– Former Distinguished Architect at Leading AdTech Company*

Advantages of OcientCloud

The OcientCloud is comprised of multiple high-performance servers and networks that are optimally designed to run Ocient software. We provide this optimization without charging public cloud pricing premiums, which makes the OcientCloud the most price effective solution for companies with the largest data ingest and analysis needs.

The OcientCloud uses the best possible hardware for the Ocient Hyperscale Data Warehouse, thereby optimizing price-performance for your workloads

Furthermore, it's possible to get a prototype up and running almost immediately in the OcientCloud. That means there's no need to purchase hardware and wait for its arrival.

Dedicated OcientCloud hardware also ensures:

- ✓ **No shared workloads**
- ✓ Equipment is in a **virtual private cloud (VPC),** eliminating concerns about data security or data leaks
- ✓ **Physical boundaries around servers** provide better data control
- ✓ **No competition** for resources
- ✓ **No multi-tenant tradeoffs**

A WORLD CLASS DATA CENTER THAT PROVIDES THE BEST FACILITIES FOR YOUR SOLUTION

Limitless Internet Connectivity

- Situated on the major east/west connection for the United States, with access to almost infinite bandwidth
- Offers hundreds of Gigabits of bandwidth thanks to redundant, dedicated networking

100% Green Hosting

- Uses 100% renewable power
- Located in a LEED Gold and Energy Star Certified building

World-Class Security

- Includes audited SOC II operations management
- Hosted in a secure datacenter with PCI, ISO 27001, FISMA High, and HITRUSTcertifications

OcientCloud solutions are fully managed, 24/7

Leverage Ocient's team of experts to manage your hyperscale cloud solution 24/7. Our team handles everything from DevOps to DBA tasks including optimization and performance monitoring with SLAs in place for live support, if needed.

Get more from your data with Ocient's fully-managed service, including:

- Automatic load balancing as datasets dynamically expand or shrink
- Comprehensive monitoring portals for system admin access
- 24/7 support, including weekends and holidays, at no extra charge
- Training and onboarding support
- Network-level lockdown and secure access controls
- DevOps responsibilities handled by Ocient
- Remote infrastructure monitoring, logging and incident response
